PRINS OCAMPO

SOFTWARE ENGINEER

PROFILE

I am a passionate software engineer with more than 3 years of experience, dedicated to solving problems and building efficient, user-friendly web solutions.

Constantly learning and improving, I thrive on exploring new technologies and refining my skills to deliver impactful results

WORK EXPERIENCE

- **Mu Digital** JAUNARY 2025 - PRESENT
Software Engineer SG (Remote) 🇵🇭
 - Converting Figma designs into responsive web pages.
 - Fullstack development with support for third-party APIs such as Discord and other external services.
 - Built dApp interfaces for Web3 features such as wallet interactions and user on-chain states.
 - Integrated smart contracts and implemented on-chain reads to power blockchain-driven quests and features.
- **Play It Forward** SEPTEMBER 2022 - DECEMBER 2024
Junior Web Developer SG (Remote) 🇵🇭
 - Worked as a full-stack developer, handling both frontend (React, Next.js) and backend (Firebase, MongoDB, Nestjs) development.
 - Independently built and maintained landing pages and web app pages, ensuring high-quality user interfaces and seamless functionality.
 - Integrated third-party APIs such as Twitter, Steam, and Discord into web applications.
 - Conducted extensive research to support a small team environment, including learning new technologies such as WordPress, blockchain, game development, and mobile development.
- **Symph Co** April 2022 - June 2022
Web Developer Intern PH (Remote) 🇵🇭
 - Collaborated with developers, project managers, and QA testers on website development.
 - Shadowed senior developers to learn workflows and best practices.
 - Worked on bug fixes and minor feature enhancements.

TECHNICAL SKILLS

Frontend
